

EXPERT REPORT

Ordered by: YSHIELD EMR-Protection
Christian Danner
Am Schulplatz 2
D-94099 Ruhstorf
Germany

Device under Test : Shielding fabric CURTAIN

Subject: Shielding-measurements of electromagnetic waves from
800 MHz to 6 GHz, polarization vertically and horizontally

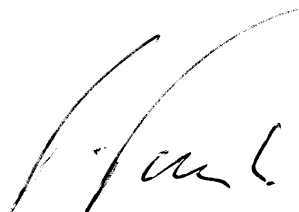

Regulations: According to MIL-Standard 285, IEEE-STD 299-1997 and
VG-Standard 95 370-15, KS03

**Date of
Measurements:** 23rd of February 2010

Contents: 1 page text, 2 measured diagrams in the 2 appendices

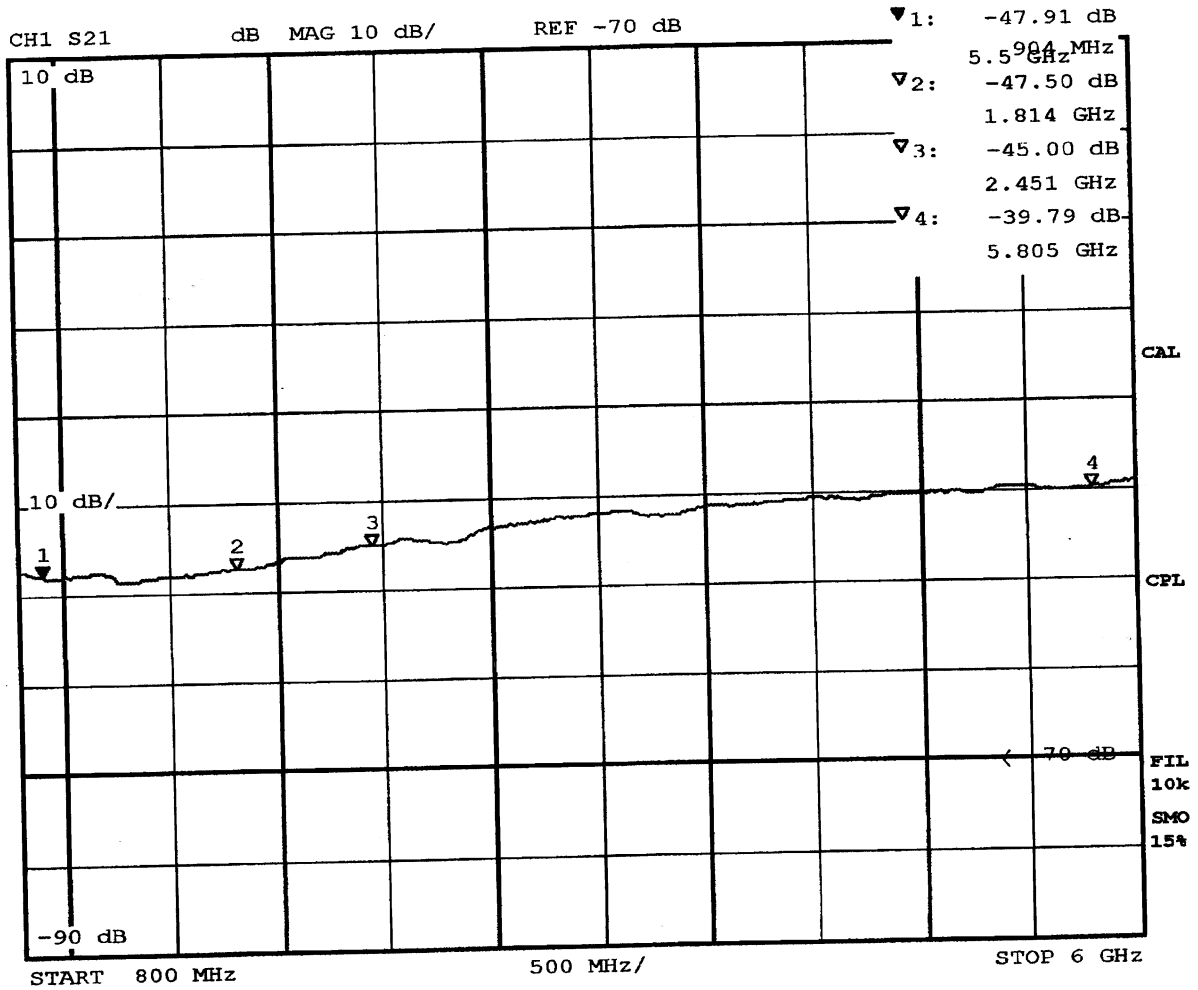

Results: The measurements proved, that the shielding fabric CURTAIN
presented a totally identical shielding effectiveness to vertically and
horizontally polarized electromagnetic waves.
Details about the shielding effectiveness can be found in the appendices.

Neubiberg, 27th of February 2010

Prof. Dipl.-Ing. P. Pauli

Device under test: **Shielding fabric CURTAIN**
(Frequency range: 800 MHz – 6 GHz)

Device under test: **Shielding fabric CURTAIN**
