YSHIELD® AF3 | Fiber additive | 0.09 liter

Crack-bridging additive for mixing with our shielding paints.

YSHIELD® AF

YSHIELD GmbH & Co. KG 94099 Ruhstorf, Germany www.yshield.com info@yshield.de **Special additive for mixing with our shielding paints.** All our shielding paints are formulated without crack-bridging carbon fibers for airless spray application. In case of cracks forming in the substrate, **this additive contains 3 mm long, electrically conductive carbon fibers** which guarantee the grounding even without using the grounding strap.

Processing

Stir in the additive (90 ml) into 5 liter shielding paint. Use an electro mixer for at least for one minute, that all mixes homogeneously.

Technical data

- For the following shielding paints: HSF54, MAX54, L40, PRO54, HSF64
- Delivery size: 90 ml
- Coverage: Mix with 5 liters of shielding paint
- Ingredients: Water, carbon fibers, additives, preservative (BIT, INN, MIT)
- Color: Black
- Frost resistant (3 frost-/thaw cycles), shippable year-round
