

YSHIELD® Sample set HF shielding paints | 4x 250 ml

Sample set of our HF shielding paints for testing.

YSHIELD® HF-paints samples

**Sample set of our HF shielding paints HSF54, MAX54, PRO54, HSF64.
Attention: Only one set per customer!**

As all our shielding paints are black, they are quite hard to distinguish from each other at first sight. However, there are considerable chemical differences concerning binding agent, smell, viscosity, performance while processing. With our sample set you can test the adhesive strength on undergrounds or the adhesive strength of top coatings.

Scope of supply: Each 0.25 liters of HSF54, MAX54, PRO54, HSF64. Small spoons.
